Join us for Monthly ½ and Full-Day Workshops

“We take the basics of the accounting and the finance function and boil it down to ‘what you really need to know to run your business’, while getting into the detail of financial statements with case studies.

We prepare you for the real world of growing your business and controlling what is important.”

“Lorraine’s ability to share her expertise was nothing short of amazing. Her knowledge of accounting practices proved to be insightful and thought provoking, and led to very stimulating conversation.
